

RFP: E-commerce Platform

Project Overview:

We need an e-commerce platform that will allow users to browse, purchase, and track products. The platform should include shopping cart functionality, user registration, and payment gateway integration.

Features:

- Product Catalog (Search and Filter)
- Shopping Cart (Add, Remove, Checkout)
- User Registration and Login
- Order History and Tracking
- Payment Gateway Integration (e.g., Stripe, PayPal)
- Admin Panel for Product Management

Tech Stack:

- Backend: Node.js with Express
- Database: MongoDB
- Frontend: AngularJS
- Payment: Stripe API
- Hosting: AWS S3 and EC2 for scalability

Requirements:

- The platform must support multiple payment methods (Credit, Debit, PayPal).
- Secure user authentication with encryption.
- Mobile-responsive UI design.

- Real-time order updates and notifications.

Timeline:

- 6 months for full development, testing, and deployment.
